**EXAMINER'S AMENDMENT**

1. This application is in condition for allowance except for the presence of claims 15-26 to inventions non-elected without traverse. Accordingly, claims 15-26 have been cancelled.
2. The title has been changed to –method of bending laminated material--.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method of bending a laminated material made of two surface layers and a core by separating one surface layer and bending it to the desired shape and then bending the core and other surface layer to the shape of the first and bonding them together in the environment of the claim. A careful review of the claims, art, and applicant's arguments has determined that Palfey et al. would not have disclosed the claimed invention without knowledge of applicant's invention and that Palfey et al. did not recognize the problems with bending both the core and first surface layer together rather than bending the core with the second surface layer as argued by applicant on pages 17-18 of the reply dated 9/2/04. While the process of Palfey et al. would produce a smooth outer surface after bending, there is no suggestion in the reference that that was the intention or desired outcome of the process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
